

What's New in TIS-Web 3.3

VDO are delighted to tell you that as part of a program of continual improvements the latest version of TIS-Web, v3.3, will be available from Monday 30th August 2010.

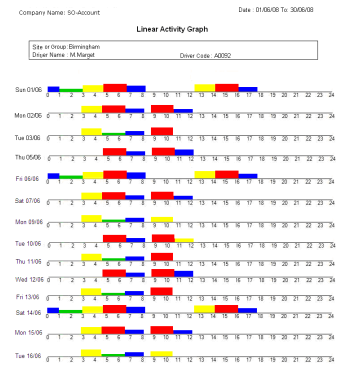

Once again this upgrade is free of charge and will be installed automatically when you first log into your account after Monday 30th August.

The new features include:

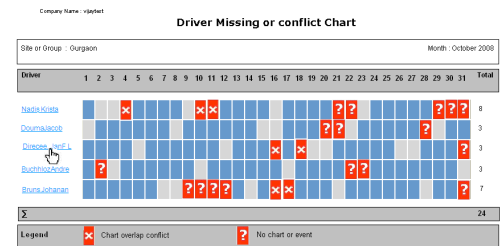

- Automatic scheduling of reports with daily, weekly or monthly delivery options to nominated e-mail addresses
- Most reports now have a CSV data option for use in spreadsheets and other software
- Infringement reports can be switched to provide Infringement Seriousness as per regulation 2009-5-EC
- Full compatibility with the latest Digital Tachographs
- Full integration with the latest remote downloading technology

New Reports

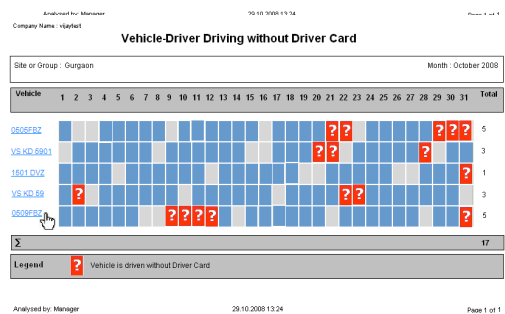

Drivers Linear Activity Graph – View a drivers extended duties as a simple bar chart style activity graph with many days per view.

A new missing chart / conflict report allows the operator to quickly identify days where chart data may be missing or in conflict with other information.

For vehicles a new report allows days where a vehicle has been driven without a driver card to be located for quick follow up.

A new Over Speeding report allows instances of over-speeding to be brought to the attention of fleet supervision.

A new off-line installer makes installation and upgrading of TIS-Web far simpler where downloading of files from the Web is not permitted.

Please note that to allow the service upgrade TIS-Web will not be available between approx 17:00 on Friday 27th August and 08:00 on Monday 30th August.

Should you have any queries about TIS-Web please contact your support team on 0121 326 1238.
